ELEVATE YOUR EQUIPMENT

Oregon SpeedCut Nano

SpeedCut™ Nano is the world's first .325" Low Profile chain chassis and therefore requires a .325" Low Profile compatible guide bar and drive sprocket. Saws not originally equipped with .325" Low Profile chain must be converted to accept the entire SpeedCut™ Nano system (chain + bar + sprocket).

STIHL & HUSQVARNA FITMENT GUIDE:

INCREASED SPEED

Optimized cutter and chain design provides up to 24% faster cutting speed, compared to 3/8" LP (Oregon® 90PX).

LONGER RUN TIME

SpeedCut™ Nano provides increased cutting efficiency, extending your run time on a single tank of gas or battery – including up to 10% more cuts per charge on cordless saws.

SMOOTHER CUTS

Designed to reduce chatter, SpeedCut™ Nano chain features a specialized bumper drive link and depth gauge that reduces vibration for the smoothest boring cuts.
